**FIBROBLAST AFTERCARE**

To briefly recap:

Following fibroblast treatment, it is important to adhere to the below aftercare advice:

- Burning sensation will soon reduce
- Anti-inflammatory / anti-histamine medication can help
- You may have some swelling especially around the eyes
- Ice packs or frozen spoons can soothe and help reduce swelling
- Occasional weeping will settle
- Formation of brown / black crusts on skin surface – DO NOT PICK!
- Crusts will flake off in a few days
- Keep treated area clean and dry
- Clean using lukewarm boiled water
- Avoid alcohol-based cleanses
- Use sunscreen if out and about
- Do not cover with plasters or occlusive dressing
- Contact for advice if the area becomes hot, red or weeps pus
- Treatment review from 6 weeks onwards
